APPL-DATE: December 22, 1993

INT-CL (IPC): C09D009/00

US-CL-CURRENT: 510/365

ABSTRACT:

PURPOSE: To obtain a cleaning agent which is used for removing coatings or the like from rigid substrates such as walls or concrete, is biodegradable and nontoxic, and practically can be applied to all kinds of substrates by compounding specific compds.

CONSTITUTION: This cleaning agent is prepd. by compounding (A) 0.1-20% ethoxylated phosphate, (B) 0.01-25% org. water-soluble amine (C) 0.01-25%

aliph. alcohol ethoxylate or nonylphenol ethoxylate, (D) 0.01-25%  
N-methylpyrrolidone, (E) 0.1-75% propylene glycol alcohol ether, (F) 0.1-75%  
dipropylene glycol alcohol ether, and (G) 0.1-40% orange terpene. Ingredient B  
is pref. triethanolamine, diethanolamine, or monoethanolamine. The aliph.  
alcohol of ingredient C pref. has an 8-18C chain. The number of ethylene oxide  
units is 2-25. Pref., the alkyl groups of ingredients E and F are each methyl,  
ethyl, propyl, or butyl. Ingredient G is pref. d-limonene.
